Technical Information

Orbisint CPS11 and CPS11D

pH electrodes, analogue and digital with Memosens technology

For standard applications in process and environment technology, with dirt-repellent PTFE diaphragm, optional built-in temperature sensor

Application

- Long-term monitoring and limit monitoring of processes with stable process conditions
  - Paper industry
  - Plastics chemistry
  - Power plants (e.g., flue gas washers)
  - Incineration plants
  - Food industry
  - Breweries
- Water treatment
  - Drinking water
  - Cooling water
  - Well water

Your benefits

- Robust electrode requiring low maintenance due to large PTFE ring diaphragm
- Certified biocompatibility
- Application under pressures of up to 16 bar / 232 psi
- Long service life due to double junction system of metal lead and thus long electrode poison diffusion path
- Sterilisable
- Process glass for highly alkaline applications available
- With optional built-in Pt 100 or Pt 1000 temperature sensor for effective temperature compensation
- Rugged TOP68 plug-in system for reliable measured value transfer

Further benefits offered by Memosens technology

- Maximum process safety through contactless inductive signal transmission
- Data safety through digital data transmission
- Easy handling due to storage of sensor-specific data
- Predictive maintenance possible due to registration of sensor load data

With ATEX, FM and CSA approval for application in hazardous areas

Endress+Hauser
People for Process Automation
**Function and system design**

<thead>
<tr>
<th>Measuring principle</th>
<th>pH measurement</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>The pH value is used as a unit of measurement for the acidity or alkalinity of a liquid medium. The membrane glass of the electrode supplies an electrochemical potential which is dependent upon the pH value of the medium. This potential is generated by the selective penetration of H⁺ ions through the outer layer of the membrane. An electrochemical boundary layer with an electric potential forms at this point. An integrated Ag/AgCl reference system serves as reference electrode. The transmitter converts the measured voltage into the corresponding pH value using the Nernst equation.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>General properties</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>▪ <strong>Low maintenance</strong></td>
<td>The sterilisable dirt-repellent PTFE ring diaphragm of the electrode prevents blocking and assures long-time stability and accuracy.</td>
</tr>
<tr>
<td>▪ <strong>Long service life</strong></td>
<td>The double junction system of the metal lead offers better protection from electrode poisons and guarantees a considerably longer service life.</td>
</tr>
<tr>
<td>▪ <strong>Durability</strong></td>
<td>Depending on the ordered version, the electrode is pressure proof up to 16 bar / 232 psi and can be applied at temperatures of up to 135 °C / 275 °F.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Important properties of CPS11D</th>
<th>Maximum process safety</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>The inductive and non-contacting measured value transfer of Memosens guarantees maximum process safety and offers the following benefits:</td>
</tr>
<tr>
<td>▪ All problems caused by moisture are eliminated.</td>
<td>▪ An automatic error message is generated if the sensor fails or the connection between sensor and transmitter is interrupted.</td>
</tr>
<tr>
<td>‐ The plug-in connection is free from corrosion.</td>
<td>▪ The availability of the measuring point is dramatically increased by immediate error detection.</td>
</tr>
<tr>
<td>‐ Measured value distortion from moisture is not possible.</td>
<td>▪ The digital signals are suitable for application in hazardous areas; the integrated electronics are intrinsically safe.</td>
</tr>
<tr>
<td>‐ The plug-in system can even be connected under water.</td>
<td></td>
</tr>
<tr>
<td>▪ The transmitter is galvanically decoupled from the medium. The result: No more need to ask about &quot;symmetrically high-impedance&quot; or &quot;unsymmetrical&quot; or an impedance converter.</td>
<td></td>
</tr>
<tr>
<td>▪ The cable does not act like an antenna. Thus, EMC safety is guaranteed.</td>
<td></td>
</tr>
</tbody>
</table>

**Data safety through digital data transfer**
The Memosens technology digitalises the measured value in the sensor and transfers it to the transmitter via a contactless connection. The result:

▪ An automatic error message is generated if the sensor fails or the connection between sensor and transmitter is interrupted.
▪ The availability of the measuring point is dramatically increased by immediate error detection.
▪ The digital signals are suitable for application in hazardous areas; the integrated electronics are intrinsically safe.

**Easy handling**
Sensors with Memosens technology have integrated electronics that allow for saving calibration data and further information such as total hours of operation and operating hours at very low or very high pH values. When the sensor is mounted, the calibration data are automatically transferred to the transmitter and used to calculate the current pH value: Storing the calibration data in the sensor allows for calibration and adjustment away from the measuring point. The result:

▪ pH sensors can be calibrated under optimum external conditions in the measuring lab. Wind and weather do neither affect the calibration quality nor the operator.
▪ The measuring point availability is dramatically increased by the quick and easy replacement of precalibrated sensors.
▪ The transmitter does not need to be installed close to the measuring point but can be placed in the control room.
▪ Maintenance intervals can be defined based on all stored sensor load data and calibration and predictive maintenance is possible.
▪ The sensor history can be documented on external data carriers and evaluation programs at any time. Thus, the current application of the sensors can be made to depend on their previous history.

**Communication with the transmitter**
Always connect the CPS11D to a transmitter with Memosens technology. Data transmission to a standard transmitter is not possible.
Data storage of CPS11D

Digital sensors are able to store the following system data in the sensor.

- **Manufacturing data**
  - Serial number
  - Order code
  - Date of manufacture

- **Calibration data**
  - Calibration date
  - Calibrated slope at 25 °C / 77 °F
  - Calibrated zero point at 25 °C / 77 °F
  - Temperature offset
  - Number of calibrations
  - Operator's signature for calibration or adjustment

- **Application data**
  - Temperature application range
  - pH application range
  - Date of first commissioning
  - Maximum temperature value
  - Operating hours at temperatures above 80 °C / 176 °F and 100 °C / 212 °F
  - Operating hours at very low and very high pH values (Nernst voltage below -300 mV, above +300 mV)
  - Number of sterilisations
  - Glass membrane impedance

These system data can be displayed with the Mycom S transmitter.

Measuring system

A complete measuring system comprises:

- CPS11 pH electrode or CPS11D digital sensor
- Transmitter, e.g. Liquisys M CPM223/253 (with Memosens technology for CPS11D)
- Special measuring cable, e.g. CPK9 or Memosens data cable CYK10
- Immersion, flow or retractable assembly, e.g. Cleanfit P CPA472
Input

Measured variables
- pH value
- Temperature

Measuring range
- Electrode version AA (for water / wastewater):
  - pH: 1 to 12 pH
  - Temperature: -15 to 80 °C / 5 to 176 °F
- Electrode version BA (for process applications, sterilisable)
  - pH: 0 to 14 pH
  - Temperature: 0 to 135 °C / 32 to 275 °F
- Electrode version FA (for hydrofluoric acid):
  - pH: 0 to 10 pH
  - Temperature: 0 to 70 °C / 32 to 158 °F

Caution!
Please note the process operating conditions.

Installation

Installation instructions
- Do not install the electrode upside down. The inclination angle must be at least 15° from the horizontal. A smaller inclination angle is not permitted as such an inclination results in air cushion forming in the glass sphere. This might impair full wetting of the pH membrane with inner electrolyte.

Caution!
- Make sure that the assembly’s threaded connection for the electrode is clean and well running before installing the electrode.
- Hand tighten the electrode (3 Nm / 2 lbf ft)! (Given value only applies to installation Endress+Hauser assemblies.)
- Make sure to follow the installation instructions in the operating instructions of the used assembly.

### Environment

#### Ambient temperature

<table>
<thead>
<tr>
<th>Caution!</th>
<th>Danger of frost damage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Do not use the electrode at temperatures below –15 °C / 5 °F.</td>
<td></td>
</tr>
</tbody>
</table>

#### Storage temperature

| 0 to 50 °C / 32 to 122 °F |

#### Ingress protection

| IP 67 (NEMA 6): | GSA plug-in head (with closed plug-in connection) |
| IP 68 (NEMA 6P): | TOP 68 plug-in head, autoclavable up to 135 °C / 275 °F (1 m / 3.28 ft water column, 50 °C / 122 °F, 168 h) |
| IP 68 (NEMA 6P): | Memosens plug-in head (10 m/ 32.81 ft water column, 25 °C / 77 °F, 45 days, 1M KCl) |

### Process

#### Process temperature

| Version AA: | -15 to 80 °C / 5 to 176 °F |
| Version BA: | 0 to 135 °C / 32 to 275 °F |
| Version FA: | 0 to 70 °F / 32 to 158 °F |

#### Process pressure

| 0 to 6 / 16 bar (versions CPS11-xBAxESA and CPS11D-7BAxx) / 0 to 87 / 232 psi (versions CPS11-xBAxESA and CPS11D-7BAx) |

#### Pressure temperature load curve

![Pressure temperature load curve](C07-CPS11xxx-05-05-00-en-001.eps)

- **A**: Versions CPS11-xBAxESA and CPS11D-7BAxx
- **B**: CPS11 and CPS11D (except CPS11-xBAxESA and CPS11D-7BAxx)

#### Conductivity

| min. 50 μS/cm |

#### pH range

| Version AA: | 1 to 12 pH |
| Version BA: | 0 to 14 pH |
| Version FA: | 0 to 10 pH |

### Reference system
Ag/AgCl metal lead with Advanced Gel 3 molar KCl, AgCl free

### Certificates and approvals

#### Ex approval CPS11 (TOP68)
- ATEX II 1G EEX ia IIC T3/T4/T6
- FM Class I Div. 2, in combination with the Mypro CPM431 and Mycom S CPM153 transmitters

#### Ex approval CPS11D
- ATEX II 1G EEX ia IIC T3/T4/T6
- Note!
Ex versions of digital sensors with Memosens technology are indicated by an orange-red ring in the plug-in head.

### Biocompatibility
Biocompatibility validated according to:
- ISO 10993-5:1993
- USP, current revision

### TÜV certificate

#### TOP68 plug-in head
Pressure resistance 16 bar (232 psi), min. triple overpressure safety

#### Memosens plug-in head
Pressure resistance 16 bar (232 psi), min. 1.5-fold overpressure safety

Accessories

Note!
In the following sections, you find the accessories available at the time of issue of this documentation. For information on accessories that are not listed here, please contact your responsible service.

Assemblies (Selection)

❑ Cleanfit W CPA450
  Manually operated, retractable assembly for installation of 120 mm / 4.72" pH/ORP electrodes in tanks and pipes,
  Ordering acc. to product structure, see Technical Information (TI 183C/24/ae)
  (Make sure to order the correct inner tube for your electrode version.)

❑ Cleanfit P CPA471
  Compact retractable stainless steel assembly for installation in tanks and pipes, manual or pneumatic operation
  Ordering acc. to product structure, see Technical Information (TI 217C/24/ae)

❑ Cleanfit P CPA472
  Compact retractable plastic assembly for installation in tanks and pipes, manual or pneumatic operation,
  Ordering acc. to product structure, see Technical Information (TI 223C/24/ae)

❑ Cleanfit P CPA473
  Retractable stainless steel process assembly, with ball valve for a particularly safe and reliable separation of the medium from the environment,
  Ordering acc. to product structure, see Technical Information (TI 344C/24/ae)

❑ Cleanfit P CPA474
  Retractable plastic process assembly, with ball valve for a particularly safe and reliable separation of the medium from the environment,
  Ordering acc. to product structure, see Technical Information (TI 345C/24/ae)
- Cleanfit H CPA475
  Retractable assembly for installation in tanks and pipes under sterile conditions,
  Ordering acc. to product structure, see Technical Information (TI 240C/24/ae)
- Unifit H CPA442
  Process assembly for the food industry, biotechnology and pharmaceutical industry, with EHEDG and 3-A certificates,
  Ordering acc. to product structure, see Technical Information (TI 306C/24/ae)
- Dipfit W CPA111
  Plastic immersion and installation assembly for open and closed tanks,
  Ordering acc. to product structure, see Technical Information (TI 112C/24/ae)
- Dipfit P CPA140
  Immersion assembly for pH/redox electrodes for demanding processes,
  Ordering acc. to product structure, see Technical Information (TI 178C/24/ae)
- Flowfit P CPA240
  Flow assembly for pH/redox electrodes, for demanding processes,
  Ordering acc. to product structure, see Technical Information (TI 179C/24/ae)
- Flowfit W CPA250
  Flow assembly for pH/redox measurement,
  Ordering acc. to product structure, see Technical Information (TI 041C/24/ae)
- **Probfit H CPA465**
  Retractable assembly for installation in tanks and pipes under sterile conditions,
  Ordering acc. to product structure, see Technical Information (TI 146C/24/ae)
- **Ecofit CPA640**
  Process connection adapter and cable set for 120 mm pH electrodes with TOP68 plug-in head,
  Ordering acc. to product structure, see Technical Information (TI 264C/24/ae)

### Buffer solutions
Technical buffer solutions, accuracy 0.02 pH, acc. to NIST/DIN
- pH 4.0 red, 100 ml (0.026 US gal.), order no. CPY 2-0
- pH 4.0 red, 1000 ml (0.264 US gal.), order no. CPY 2-1
- pH 7.0 green, 100 ml (0.026 US gal.), order no. CPY 2-2
- pH 7.0 green, 1000 ml (0.264 US gal.), order no. CPY 2-3

Technical buffer solutions for single use, accuracy 0.02 pH, acc. to NIST/DIN
- pH 4.0 20 x 20 ml (0.005 US gal.), order no. CPY 2-D
- pH 7.0 20 x 20 ml (0.005 US gal.), order no. CPY 2-E

### Measuring cables
- **CPK9 special measuring cable**
  For sensors with TOP68 plug-in head, for high-temperature and high-pressure applications, IP 68
  Ordering acc. to product structure, see Technical Information (TI 118C/07/en)
- **CPK1 special measuring cable**
  For pH/redox electrodes with GSA plug-in head
  Ordering acc. to product structure, see Technical Information (TI 118C/07/en)
- **CPK12 special measuring cable**
  For pH/redox glass electrodes and ISFET sensors with TOP68 plug-in head
  Ordering acc. to product structure, see Technical Information (TI 118C/07/en)
CYK10 Memosens data cable
For digital pH sensors with Memosens technology (CPSxxD)
Ordering according to product structure, see below
